

# SyriKit™ with PALA Technology

## Convenience Kit

**SyriKit** syringe sterile preparation kits, provide 20 syringes per kit, features a single use, closed-system header bag and integral 0.22-micron sterilizing-grade filter with a proprietary cap tool. SyriKit products enable clinicians to prepare sterile solutions without a clean room or laminar flow hood.

### Features:

- 20 syringes
- Everything inside the bag is sterile
- Fluids passing through the 0.22-micron filter are sterilized
- User technique independent
- Designed for existing user technique
- Ergonomic design
- Reduces drug waste
- Supports pharmaceutical supply chain
- Complies with FDA regulations, USP, and CDC standards
- Reduces processing steps
- All preparations are capped and sealed before opening the bag

### Benefits:

- Low cost, effective use
- Sterile components
- Sterility Assurance Level (SAL) of at least  $10^{-6}$  is maintained
- Avoids touch and other harmful microbial contaminations
- Intuitive use
- Easy-to-use
- Lowers drug costs
- Reduces probability of recalls
- Sets a higher standard for sterile preparations
- Simplifies drug preparation
- Assures a finished sterile preparation
